

UNCOVER EARNINGS

With Cover Crops

*Good For Your Land
and Your Bottom Line*

Building soil health on your farm can be one of your most important investments. By investing in cover crops, you can improve your soil health today and maintain a prosperous farm into the future. Planting cover crops can:

- *Improve water infiltration*
- *Reduce herbicide and pesticide use*
- *Prevent soil erosion*
- *Reduce nutrient leaching*

Program Incentives

- Earn \$35 per acre, per year, for planting cover crops on up to 2,000 acres.
- Contracts can be renewed annually for the duration of the Farmers for Soil Health program.
- Receive boots-on-the-ground support for implementing new or current cover crop practices from a local Technical Advisor.
